

Amendments to the Claims:

The following listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Currently Amended) A display ~~device comprising~~device, comprising
_____ at least one substrate provided with a display unit and display-unit-driving wiring ~~lines,~~lines; and
_____ a radio communication device having a communication integrated-circuit unit and an antenna,
_____ ~~wherein~~ at least a part of the antenna ~~is~~-formed on the substrate and ~~is~~-formed of a conductor formed in the same layer as a conductor that ~~constitutes~~includes the display unit or conductors that ~~constitute~~include the display-unit-driving wiring lines.

2. (Currently Amended) A display ~~device comprising~~device, comprising
_____ at least one substrate provided with a display unit and display-unit-driving wiring ~~lines,~~lines; and
_____ a radio communication device having a communication integrated-circuit unit and an antenna,
_____ ~~wherein~~ at least a part of the antenna ~~is~~-formed on the substrate and ~~is~~-formed of a conductor made of the same material as a conductor that ~~constitutes~~includes the display unit or conductors that ~~constitute~~include the display-unit-driving wiring lines.

3. (Currently Amended) A display ~~device comprising~~device, comprising
_____ at least one substrate provided with a display unit and display-unit-driving wiring ~~lines,~~lines; and
_____ a radio communication device having a communication integrated-circuit unit and an antenna,

~~wherein~~ at least a part of the antenna is formed on the substrate and is formed of a conductor formed by the same process as a conductor that ~~constitutes~~ includes the display unit or conductors that ~~constitute~~ include the display-unit-driving wiring lines.

4. (Currently Amended) The display device according to Claim 1, ~~wherein~~ the radio communication device ~~has~~ having a function of storing information concerning the corresponding display device.

5. (Currently Amended) The display device according to Claim 1, ~~wherein~~ the radio communication device ~~has~~ having at least one of a function of writing information in a radio communication device other than the corresponding display device and a function of reading information from the radio communication device other than the corresponding display device.

6. (Currently Amended) The display device according to Claim 1, ~~wherein~~ the radio communication device ~~has~~ having a function of storing at least one of information written in a radio communication device other than the corresponding display device and information of the radio communication device other than the corresponding display device.

7. (Currently Amended) The display device according to Claim 1, ~~wherein~~ the communication integrated-circuit unit is mounted on the substrate.

8. (Currently Amended) The display device according to Claim 7, ~~wherein~~ the communication integrated-circuit unit and the antenna ~~are~~ electrically connected to each other through the conductor formed in the same layer as the conductor that ~~constitutes~~ includes the display unit or the conductors that ~~constitute~~ include the display-unit-driving wiring lines.

9. (Currently Amended) The display device according to Claim 1, ~~wherein~~ an external substrate for driving the display unit is electrically connected to the substrate and a conductor provided on the external substrate is electrically connected to the antenna formed

on the substrate so that the conductor on the external substrate and the antenna on the substrate ~~constitute~~include an entire antenna, and

~~wherein~~ the communication integrated-circuit unit is mounted on the external substrate.

10. (Currently Amended) The display device according to Claim 9, ~~wherein~~ the external substrate ~~is constituted~~including of a plurality of external substrates, and the communication integrated-circuit unit is mounted on one of the plurality of external substrates.

11. (Currently Amended) The display device according to Claim 1, ~~wherein~~ the communication integrated-circuit unit ~~is constituted~~includes of a plurality of semiconductor elements formed on the substrate.

12. (Currently Amended) The display device according to Claim 11, ~~wherein~~ the plurality of semiconductor elements that ~~constitute~~include the communication integrated circuit has the same structure as another semiconductor element formed on the substrate.

13. (Currently Amended) The display device according to Claim 1, ~~wherein~~ at least a part of the antenna ~~is formed~~ on the substrate in a region excluding the display unit.

14. (Currently Amended) The display device according to Claim 13, ~~wherein~~ at least a part of the antenna ~~is formed~~ along one peripheral edge of the substrate.

15. (Currently Amended) The display device according to Claim 1, ~~wherein~~ the conductor formed above the antenna on the substrate to ~~constitute~~include the corresponding display device does not overlap the antenna in plan view.

16. (Currently Amended) A display ~~device comprising~~device, comprising:
_____ at least one substrate provided with a display unit and display-unit-driving wiring ~~lines,~~lines; and

_____ a radio communication device having a communication integrated-circuit unit and an antenna,

_____ ~~wherein~~ at least a part of the radio communication device is formed directly ~~formed~~ on the substrate.

17. (Currently Amended) An electronic ~~apparatus comprising~~ apparatus,
comprising:

_____ the display device according Claim 1.

18. (Currently Amended) An electronic ~~apparatus comprising~~ apparatus,
comprising:

_____ the display device according to Claim 1 and a charging unit electrically connected to the antenna of the radio communication device through a rectifying unit ~~for~~
~~controlling~~ to control the flow of the current in one direction,

_____ ~~wherein~~ the antenna is used as an antenna ~~for charging~~ to charge power into the charging unit from the outside using electromagnetic induction.

19. (Currently Amended) The electronic apparatus according to Claim 18
~~comprising~~ 18, further comprising:

_____ another apparatus excluding the display device electrically connected to the charging unit,

~~wherein~~ the other apparatus is driven by the power charged in the charging unit.

20. (Currently Amended) An electronic ~~apparatus comprising~~ apparatus,
comprising:

_____ a first display device and a second display device,

~~wherein~~ the second display device ~~is being~~ the display device according to Claim 1 and ~~is provided~~ on the surface opposite to the surface on which the first display device is provided.

21. (Currently Amended) The electronic apparatus according to Claim 20, ~~wherein~~ the first display device ~~displays~~ displaying at least one of information written in a radio communication device other than the corresponding display device by the second display device and information read from the radio communication device other than the corresponding display device by the second display device.

22. (Currently Amended) The electronic apparatus according to Claim 20, ~~wherein~~ the first display device ~~stores~~ storing and ~~displays~~ displaying at least one of information written in a radio communication device other than the corresponding display device by the second display device and information read from the radio communication device other than the corresponding display device by the second display device.

23. (Currently Amended) An electronic ~~apparatus comprising~~ apparatus,
comprising:
_____ the display device according to Claim 1, ~~wherein~~ the display device ~~displays~~ displaying at least one of the information written in a radio communication device other than the corresponding display device and the information read from the radio communication device other than the corresponding display device.

24. (Currently Amended) An electronic ~~apparatus comprising~~ apparatus,
comprising:
_____ the display device according to Claim 1, ~~wherein~~ the display device ~~stores~~ storing and ~~displays~~ displaying at least one of information written in a radio communication device other than the corresponding display device and information read from the radio communication device other than the corresponding display device.

25. (Currently Amended) The electronic apparatus according to Claim 23, ~~wherein~~ at least a part of one surface and the other surface of the display device ~~is~~ exposed to the outside.

26. (Currently Amended) The electronic apparatus according to Claim 23, ~~wherein~~ the display device ~~is~~ being a display device capable of displaying images on any of the one surface and the other surface of the display device.

27. (Currently Amended) The electronic apparatus according to Claim 17, ~~wherein~~ the radio communication device other than the corresponding display device ~~reads~~ reading information concerning the corresponding electronic apparatus from the radio communication device and ~~writes~~ writing information concerning the corresponding electronic apparatus in the radio communication device as data.

28. (Currently Amended) The electronic apparatus according to Claim 27, ~~wherein~~ the radio communication device ~~is~~ driven by radio waves input to the antenna from the outside.

29. (Currently Amended) The electronic apparatus according to Claim 27 ~~comprising~~ further comprising:
_____ a power source unit electrically connected to the radio communication device, ~~wherein~~ the radio communication device ~~is~~ being driven by the power of the power source unit.

30. (Currently Amended) The electronic apparatus according to Claim 17, ~~wherein~~ the information concerning the corresponding electronic apparatus ~~is~~ being rewritten in the radio communication device as data.

31. (Currently Amended) The electronic apparatus according to Claim 30, ~~wherein~~ the radio communication device ~~comprises~~ includes a writing unit ~~for writing~~ to write information concerning the corresponding electronic apparatus as data, and

~~wherein~~ a rewritable region and a non-rewritable region are provided in the writing unit.

32. (Currently Amended) An electronic ~~apparatus comprising~~ apparatus, comprising:

_____ a display device ~~comprising~~ including at least one substrate provided with a display unit and display-unit-driving wiring ~~lines,~~ lines; and

_____ a radio communication device having a communication integrated-circuit unit and an antenna,

_____ ~~wherein~~ at least a part of the antenna ~~is~~ formed on the substrate of the display device and ~~is~~ formed of a conductor formed in the same layer as a conductor that ~~constitutes~~ includes the display unit or conductors that ~~constitute~~ include the display-unit-driving wiring lines, and

_____ ~~wherein~~ information concerning the corresponding electronic apparatus is being written in the radio communication device as data.

33. (Currently Amended) An electronic ~~apparatus comprising~~ apparatus, comprising:

_____ a display device ~~comprising~~ including:

_____ at least one substrate provided with a display unit and display-unit-driving wiring ~~lines,~~ lines; and

_____ a radio communication device having a communication integrated-circuit unit and an antenna,

_____ ~~wherein~~ at least a part of the antenna ~~is~~ formed on the substrate of the display device, and ~~is~~ formed of a conductor made of the same material as a conductor that ~~constitutes~~ includes the display unit or conductors that ~~constitute~~ include the display-unit-driving wiring lines, and

_____ ~~wherein~~ information concerning the corresponding electronic apparatus is
being written in the radio communication device as data.

34. (Currently Amended) An electronic ~~apparatus comprising~~ apparatus
comprising:

_____ a display device ~~comprising~~ including at least one substrate provided with a
display unit and display-unit-driving wiring ~~lines~~, lines; and

_____ a radio communication device having a communication integrated-circuit unit
and an antenna,

_____ ~~wherein~~ at least a part of the antenna ~~is~~ formed on the substrate of the display
device and ~~is~~ formed of a conductor formed by the same process as a conductor that
constitutes the display unit or conductors that constitute the display-unit-driving wiring lines,
and

_____ ~~wherein~~ information concerning the corresponding electronic apparatus is
being written in the radio communication device as data.
